GLOBAL COVERAGE

From the outset, the long-range strategy of Transoceanic has been to provide an increasingly comprehensive package of seamlessly integrated logistics and material handling services to the global transportation community.

With this focus, the company's infrastructure its systems, services, facilities and personnel-support a project management team approach in responding to the global transportation needs of such entities as engineering, process construction, civil construction, government services, energy service and mining concerns.

Today, Transoceanic provides a total logistics management package, including international forwarding, ship and cargo aircraft chartering, export packing and consolidation, inventory management, inland haulage, project transportation management, procurement management, customhouse brokerage, marine agency services, project development and heavy equipment leasing (in accordance with Lloyd's Register of Quality Assurance standards).

In addition to partnering with and serving the world's leading engineering and construction concerns, we also handle many large and small commercial importers and exporters, primarily in the chemical, steel, wood products and heavy manufacturing sectors. Our strong traffic expertise, integrated systems capabilities and rigid attention to detail make transoceanic attractive to both commercial and project shippers. Our strategically located global offices and long-standing partnerships support an international presence that keeps us at the forefront of project development.

*...a total
logistics
management
package...*

Together, they provide us with the capability to handle cargo on a door-to-door basis from all continents to any destination site on a turnkey project basis... with 24-hour website tracking and monitoring.

A leader in particularly challenging areas of the globe, Transoceanic currently leads the development and reconstruction efforts in many conflict zones and unstable regions. With teams of experts in all strategic locations, a dense worldwide network and stringent security measures for our people and cargo, we are uniquely poised to provide a complete range of logistics services while working under the most extreme conditions

Although many factors have contributed to Transoceanic's development, the key factor in our growth and success is the quality and dedication of our worldwide employee teams. Each and every one of whom is trained to respond to client requirements with that single most important quality- a sense of team urgency.

Ultimately our team approach to quality management has enabled us to make significant contributions to clients' logistics programs.... And earn Transoceanic the reputation as one of the world's prominent project logistics management specialists.

WORLDWIDE LOGISTICS MANAGEMENT

Exceeding client expectations is our key objective, from any point in the global supply chain to any worldwide destination. Our knowledgeable and experienced logistics teams provide clients with a dynamic range of services designed to keep cargo moving efficiently and cost-effectively

PROJECT MANAGEMENT SPECIALISTS

Experienced global project management teams ensure the safe delivery of entire project cargoes on a turnkey basis, from multiple vendors and suppliers and /or multiple points of origin, to jobsites worldwide.

ANYWHERE IN THE WORLD

Exceeding client expectations is our key objective, from any point in the global supply chain to any worldwide destination. Our knowledgeable and experienced logistics teams provide clients with a dynamic range of services designed to keep cargo moving efficiently and cost-effectively.

This coupled with ongoing investments in export packing facilities, global office expansion and cutting-edge technology enable us to

bring the world closer than ever before.

With many years of worldwide logistics management experience paved the way for the utilization of advanced technology for cargo tracking, reporting and documentation. This unique and detailed software system traces and monitors cargo movements worldwide. Clients are now able to access status reports on their shipments through www.ttdglobal.net as well as download information through EDI transactions to and from their respective locations.

TRAINED AND READY

Experienced global project management teams ensure the safe delivery of entire project cargoes on a turnkey basis, from multiple vendors and suppliers and/or multiple points of origin, to jobsites worldwide.

Project teams can also be assigned to work in the client's project offices and at the jobsite with seamless linkage to our C2C system. Turnkey solutions are initiated by our global project teams. We receive and check all cargo delivered to our depots. The cargo is then bar-coded and export packed and/or containerized as necessary. All bookings are negotiated and confirmed with the most suitable ocean or air carrier, including heavy lifts negotiated with specialized carriers. Cargo clearance is handled promptly, followed by haulage to the jobsite and inventory management.

Supporting our team management approach is our C2C materials handling, tracking and monitoring system, which tracks the status of all purchase order line items and printed reports. Utilizing bar-coded labels for all materials, cargo is tracked by P. O. Line and sub-line item, from the time a purchase order is entered into our system until the time it is delivered to the jobsite. In addition, digital images of major load-outs are e-mailed to clients to document the physical progress of their

shipments.

Other services include thorough cost analysis of all feasible transport options, as well as the combining and consolidation of specific cargoes for added cost savings. Logistics plans and site surveys can be conducted to further expedite project movements and to determine the most expeditious and competitive transportation solutions.

PROTECTION ALL THE TIME

Our warehousing and export packaging facilities provide a full range of service to meet all requirements for ocean, air and domestic shipments, including the storage and 24-hour protection of client cargoes.

Unique services include receiving, line-item checking and verification of materials, moisture barrier, vacuum packing, on-site industrial boxing, packing that meets Governmental/Military specifications, packing and marking of hazardous materials, and the consolidation and securing of equipment and supplies into containers, flat racks and platforms. In the United States, we also provide controlled-access facilities and security-cleared personnel for the handling of sensitive embassy cargo.

*...packing
that meets
Governmental/
Military
specifications*

Through C2C, our materials tracking and monitoring system, clients can access their accounts by entry password on our website at www.ttdglobal.net. This system provides receiving reports, overage/shortage/damage reports on-hand inventory, purchase order status reports, open-item reports, export packing lists and inland bills of lading

Materials can be tracked by line-item and sub-item, from the time a purchase order is entered into our system, through delivery to the jobsite. Utilizing barcode labels for all packages, every aspect of jobsite inventory can be accomplished through this system.

COST SAVINGS & BUYING POWER

Our chartering and heavy-lift teams handle vessel and aircraft charters, contracts of carriage, and the management of specialized movements of heavy lift aircrafts, vessels, submersibles, tugs, barges and ro-ro's.

Transoceanic has the unique resources of heavy-lift planning and execution, which includes thorough analysis of the technical requirements of the movement from ex-works to site. Consulting and cargo fixtures are offered to client engineering, procurement and traffic departments on a worldwide basis to assist in the advance planning of their shipments.

Pre-planning for site and route surveys are also conducted; particularly for large overseas projects where a detailed investigation of port facilities and local transportation infrastructure are in question. Transportation cost savings are achieved through leveraging our buying power in the market and combining cargoes to each shippers benefits.

Transoceanic is an IATA air cargo accredited agent for commercial and project forwarder with established working relationships with air carriers worldwide. We provide a comprehensive and professional air freight management service for all materials and equipment transported via commercial scheduled flights and charter-based service.

Our extensive experience in moving all types of cargo, coupled with our knowledge of all ocean carrier types, aircraft configurations/ systems, and dedicated staff allows us to provide cost-efficient ocean and air freight transportation and charters on a worldwide basis.

WAREHOUSING AND EXPORT PACKAGING

Our warehousing and Export Packaging facilities provide a full range of services to meet all requirements for ocean, air and domestic shipments, including the storage and 24-hour protection of client cargoes.

Our web-based cargo tracking system, C2C, provides our clients with instant, real-time, 24/7 access to all information and documentation related to their shipment from any computer, any location, worldwide.

Purchase orders are imported electronically, by line-item and sub-line item, and makes it immediately available to the client. It also provides complete information on all stages of a given shipment, displayed on a single page. The moment each stage is completed C2C is instantly updated, providing clients with real-time information on the status of their cargo. This data can be accessed via our website 24/7 from any computer with internet access. This provides our clients with total purchase order visibility whenever they wish to view the status of their orders.

In addition to our comprehensive tracking page, documents such as Material Receipts, Commercial Invoices/Packing List and Airway Bill/Bill of lading can be printed to a local printer. Electronic Customs Automation is used for both exported and imported cargo. Information provided by C2C can also be downloaded into Microsoft Excel to provide the client with customized reporting capabilities. Transoceanic's state-of-the-art data infrastructure allows for all methods of data transfer, such as flat file, EDI and XML. Security systems can establish a Virtual Private Network (VPN) between systems. Leased lines enable direct linkage between systems. High-speed Internet connections provide superior response and minimal latency. Data can be transferred by means ranging from the simplest methods...to the most sophisticated. Most data files are transferred via email and FTP, while formats include text delimited files, Excel, Access and XML

With C2C, project logistics information flows seamlessly.

CHARTERING AND HEAVY-LIFT

Our chartering and heavy-lift teams handle vessel and aircraft charters, contracts of carriage, and the management of specialized movements of heavy lift aircrafts, vessels, submersibles, tugs, barges, and ro-ro's

WE CAN HANDLE IT

Transoceanic provides marine agency services through our subsidiaries acting as ship's agent, the marine operation provides port, cargo and general protective agent's services designed to suit the most exacting needs of each client.

Cargo handling services at both public and private stevedoring facilities are offered, as well as fuel bunkering, bonded stores, fresh water, medical supplies, barging and launches, general transportation and crew accommodation, marine surveyors, vessel chartering, dry-docking and vessel repair,

Most active in assisting companies in the offshore construction, fabrication and drilling sectors, we also specialize in handling submersible, heavy-lift, tugs, barges, tramp and liner vessels.

Additional domestic and international support is also given through a network of highly skilled agents located at strategic points throughout the world.

MARINE AGENCY SERVICES

Transoceanic provides marine agency services through our subsidiary acting ship's agent, the marine operation provides port, cargo and general protective agent's services designed to suit the most exacting needs of each client.

REAL-TIME INFORMATION

Transoceanic is uniquely posed to efficiently manage the logistics of your imports. Our highly experienced team is electronically linked to all applicable government authorities that control the admission of imported cargoes. Real-time shipment status information is instantly available via our C2C web-based cargo tracking system 24/7 from anywhere in the world.

This fully integrated system enables us to expedite the clearance of imported cargoes while insuring that they are compliant with all government agency requirements. Our direct electronic link to the government authorities enables us to determine cargo release status, quota level status, duty rates and filing of FDA prior notices.

Other specialized areas of import transactions include temporary import bonds, customs drawback services, the filing of customs petitions and protests, door-to-door service from shipper's warehouse to importer-including marine insurance – and the admission and withdrawal of foreign Trade Zone merchandise.

As project specialists, we handle the complete management and coordination of transportation via land, sea or air... from international vendors to project sites. Such inbound project services include the handling of heavy-lift and oversize cargoes, containerized materials, bulk, breakbulk, commercial and project assignments.

EXPERTS IN THE FIELD

Through a global network of offices and transportation partners, we are able to find business development opportunities in the petrochemical, power, refining, mining, civil, oil and gas sectors, wherein we participate as project developer/agent.

Our expertise, competitive pricing, financing and demanding technical standards-coupled with long-standing relationships with manufacturers, distributors and engineering and construction concerns-enables us to facilitate the partnering characteristics necessary to develop such projects.

Our marketing personnel possess in-depth technical backgrounds in all phases of industrial sector projects, as well as a thorough knowledge of the industries represented. Our clients can then be assured of the industry's finest services utilizing the talents and experience of personnel who help insure the success of each development initiative.

REMEMBER...

With extensive experience in providing the widest possible array of personalized global transportation management services, Transoceanic personnel remain committed to continuous quality improvement and client satisfaction.

Our growing network of domestic and international offices continues to support the expanding needs of our clients through the handling of global cargo movements of any size or scope to any destination on earth.

We embrace the challenges of an ever changing and dynamic global market with investments in new technology and infrastructure designed to make doing business more efficient and cost-effective than ever before. It is this solid commitment to excellence on all fronts that will keep us at the forefront of the worldwide logistics management industry.

PROJECT DEVELOPMENT AND TRADING

Through a global network of offices and transportation partners, we are able to find business development opportunities in the petrochemical, power, refining, mining, civil and oil and gas sectors, in addition to one-off specialized procurements, betonite, heavy equipment, construction, E&P upstream/downstream, GHS (Aviation Ground Handling service equipment), wherein we participate as project developer/ Agent.
